Education

- **Java web development (Courses)**
  TelRan GmbH
  Jan 2023 - Dec 2023

Skills

Java

Spring Framework

Database Management

MySQL/PostgreSQL

API Development

Docker/Kubernetes

Linux

Languages

Romanian - Native Speaker

English - Fluent

German - Fluent

Summary

Experienced Backend Developer with strong knowledge of Agile Software Development practices, Rest API, Springboot, and Kubernetes. Proficient in Java, API, Git, SQL, Design patterns, System design, and CICD fundamentals for containerization, refactoring, authentications, and re-platforming.

Work Experience

Backend Developer, SmartSoftAcademy, Remote
September 2023 - May 2024

- Enhanced user experience by optimizing search algorithms, resulting in faster and more efficient searches.
- Implemented comprehensive security protocols, including user authentication and encryption, to safeguard sensitive data.
- Created intuitive APIs with thorough documentation to facilitate seamless integration with external systems and support third-party developers.
- Managed database operations efficiently using MySQL and PostgreSQL, ensuring reliable data storage and retrieval for bookings and user information.

Java Web Developer, Final Exam Project: "Banking service"
November 2023 - December 2003

- Developed an efficient system for managing accounts, transactions, and agreements for banking services.
- Implemented systems for managing product catalogs and banking cards.
- Ensured clean and well-documented code, adhering to best practices in Java Back End development.
